Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 August 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 13, drawn to packaging using stamped strip, classified in class 206, and subclass 701.
 - II. Claims 16 and 17, drawn to a method of making or assembling a motor, classified in class 29, subclass 596.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different mode of operation since the invention I is drawn to transporting and protecting assembled elements from one location to another, while invention 2 is related to assembling the parts in a common structure.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

4. During a telephone conversation with Roger R. Parkhaust on November 30, 2001 a provisional election was made with traverse to prosecute the invention of I, claim 13.

Affirmation of this election must be made by applicant in replying to this Office action. Claims 16 and 17 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Priority

6. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/401,987 filed September 23, 1999 now abandoned. ***Claim Rejections - 35 USC § 112***

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. **Claim 13** is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In line 2, "said emboss" lacks antecedent basis and is indefinite since it is not clear if the motor is embossed in one of the plurality of embosses or the plurality of embosses are embossing one motor.

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2834

10. **Claim 13** is rejected under 35 U.S.C. 103(a) as being unpatentable over **Bianca et al.** (US 5,706,952) in view of **Viskochil** (US 5,672,927).

Bianca et al. discloses a tape like package having a plurality of embosses 14 for accommodate electrical components 16 of different size and shape or configuration for the purpose of automatic placement on a printed circuit board. However, **Bianca et al.** fails to disclose specifically a brushless motor being accommodated in the package.

Viskochil discloses in Figures 6 and 7 a brushless motor 40 placed in a printed circuit board (Re column 4, lines 36-40) for the purpose of eliminating plastic connectors.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to design the package as taught by **Bianca et al.** To accommodate the brushless motor to be installed in a printed circuit board as taught by **Viskochil** for the purpose of automating the process of installation of the motors and the board on an assembly line.

Prior Art

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
